

Healthcare Bill Assistant

Turning confusing hospital bills into clear answers and real financial help for patients

Capstone Overview

- **Team:** Aziza, Faisal, Mary & Sadaf
- **Clients:** Matthew Wells & Diego Estuar, Cedars-Sinai Health System
- **Faculty Advisor:** Professor Tao Youyou

The Problem

Bills Are Hard to Read

Line items, codes & adjustments are unclear even to people with industry experience.

Help is Hard to Find

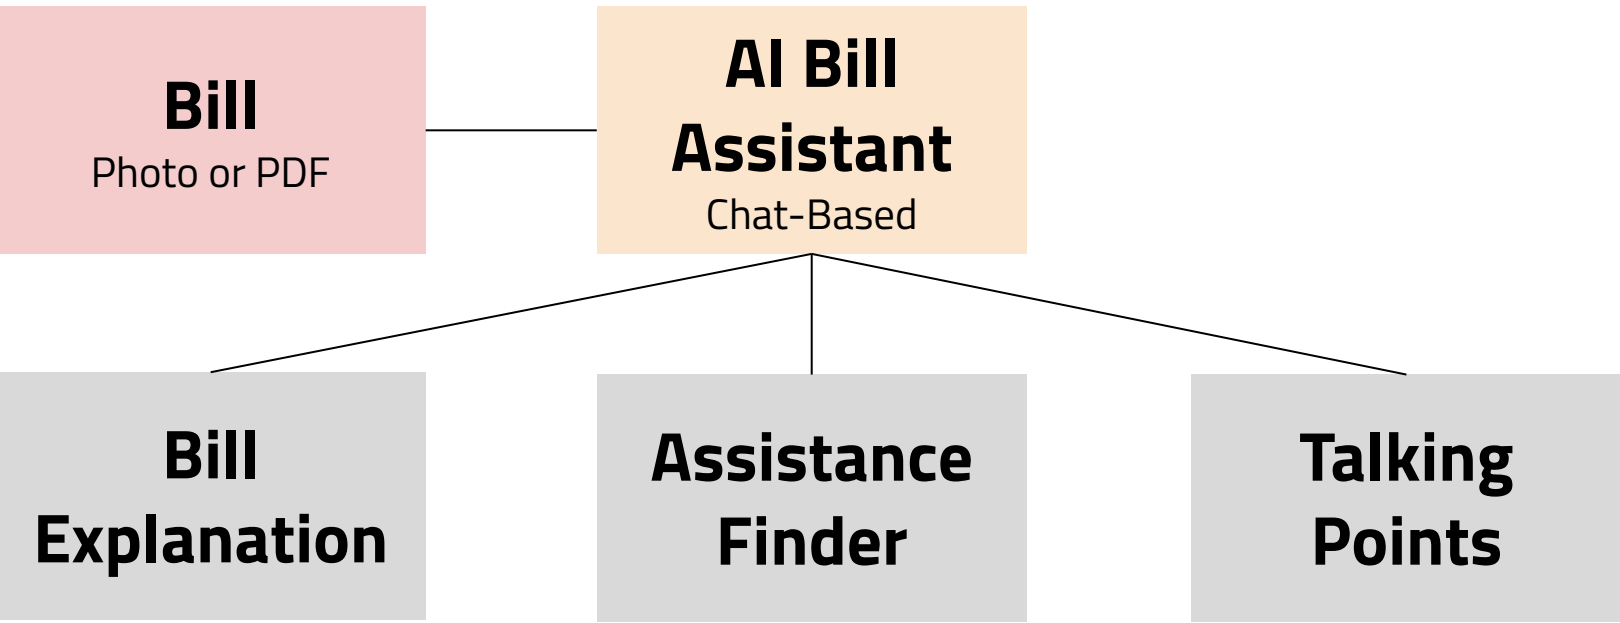

Financial assistance, Patient Services & insurance contacts aren't surfaced to patients.

Patients Are Left Guessing

Even when patients do reach out, they may not know what kind of questions to ask.

Our Solution

An AI chat assistant patients can talk to directly* by uploading a bill and getting clear answers back.

**Built with guardrails: the assistant never makes legal, medical or final coverage determinations.*

AI Bill Assistant

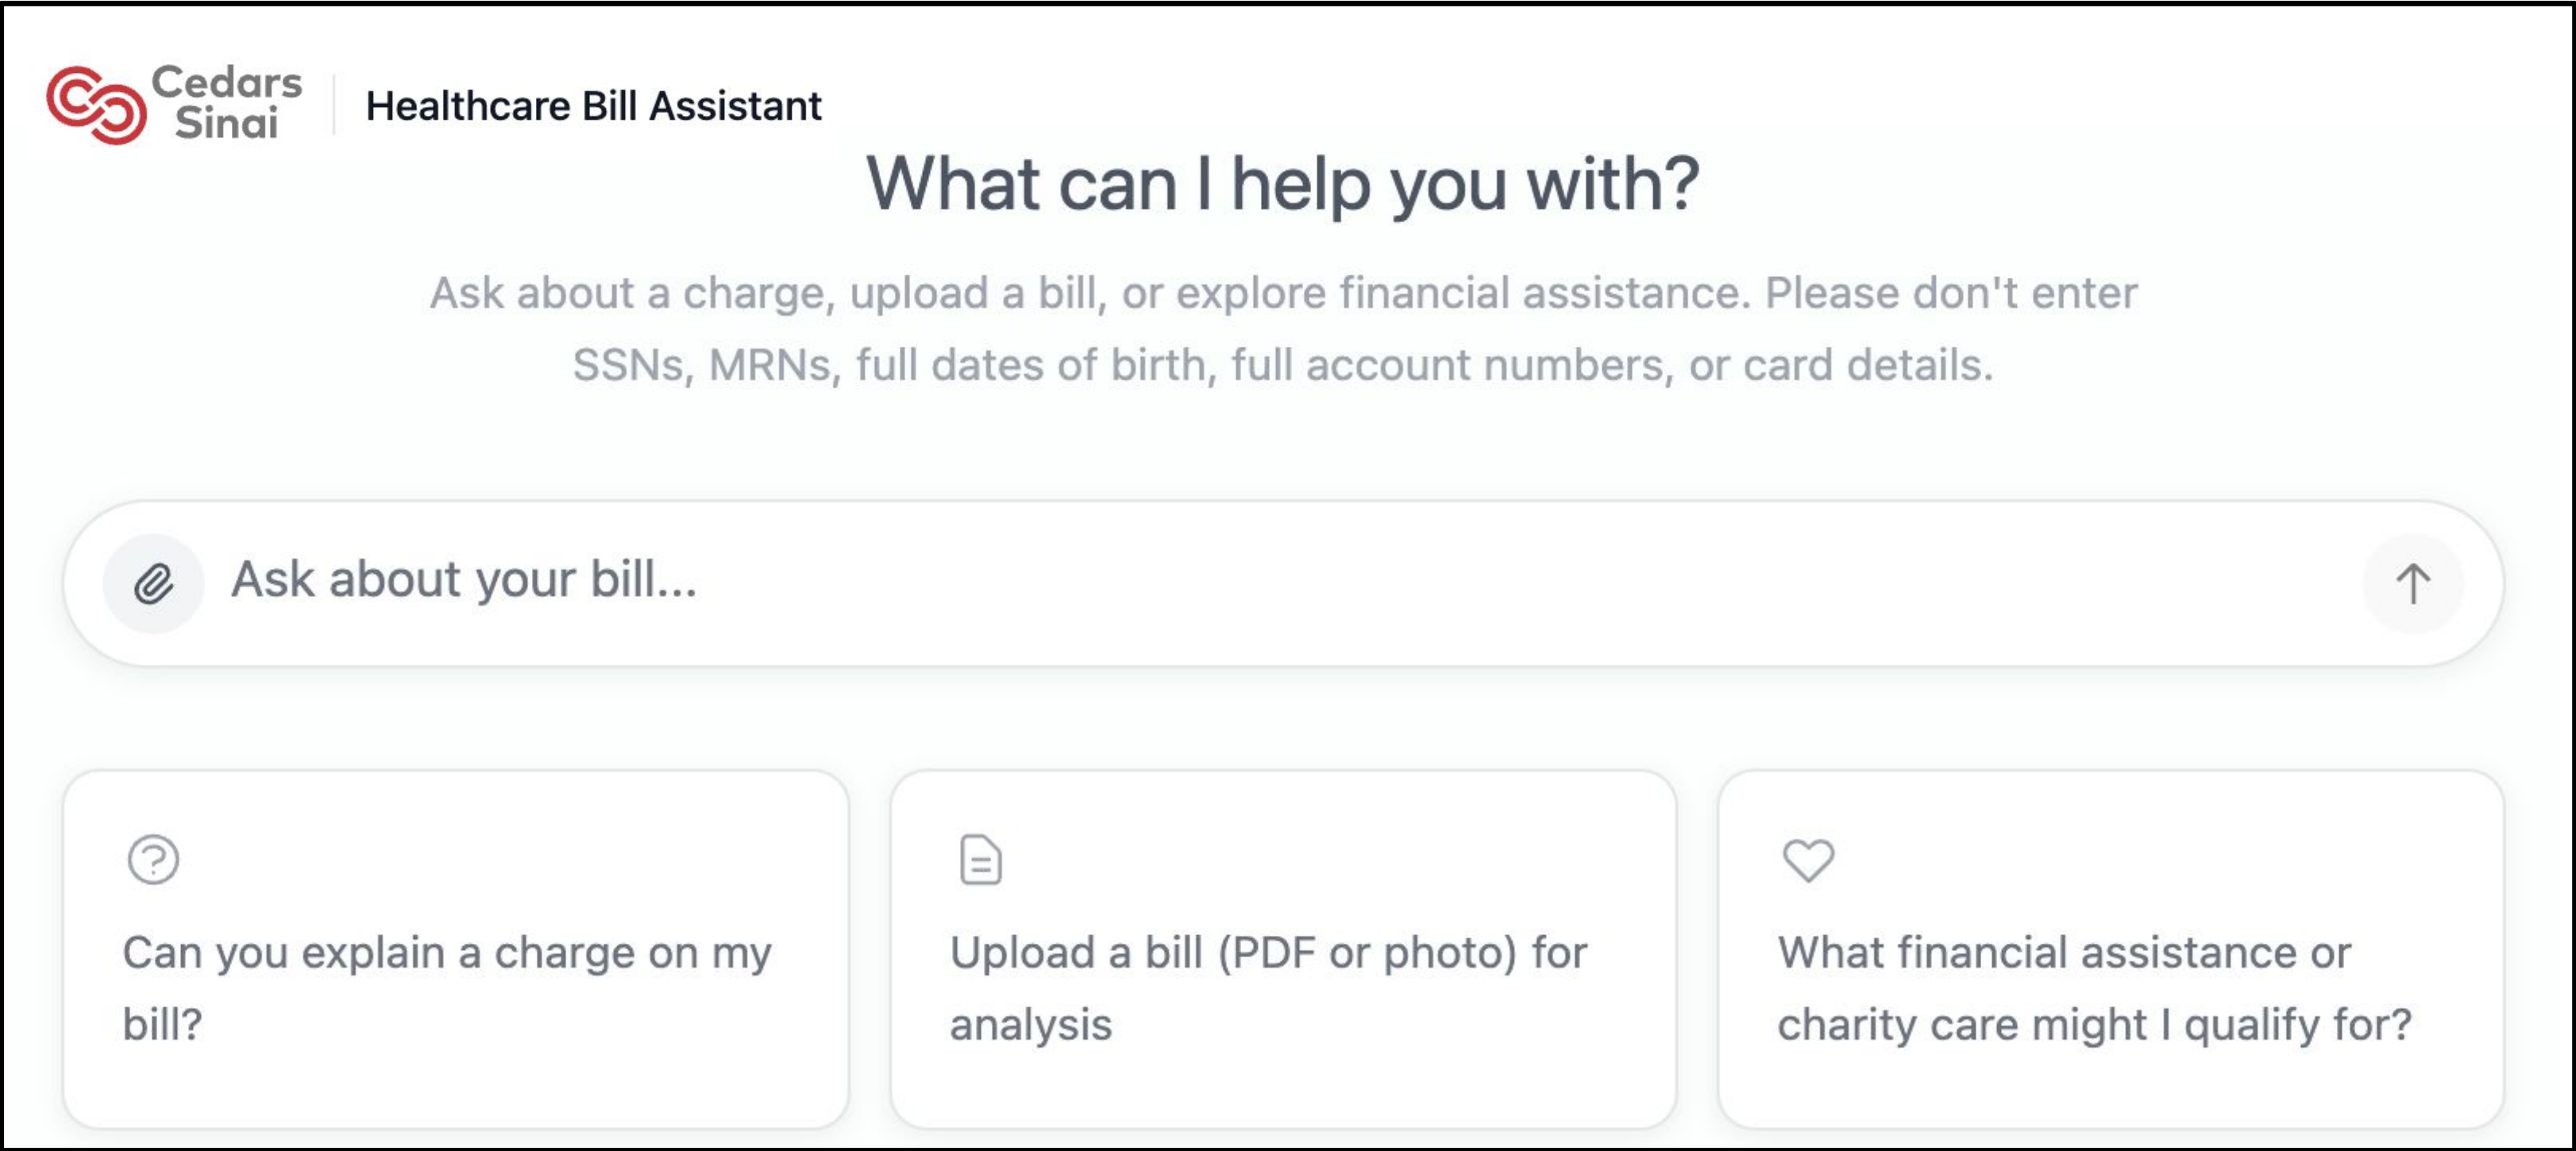

Figure 1. Agent homepage where patients can ask billing questions, upload a bill, or look for financial assistance.

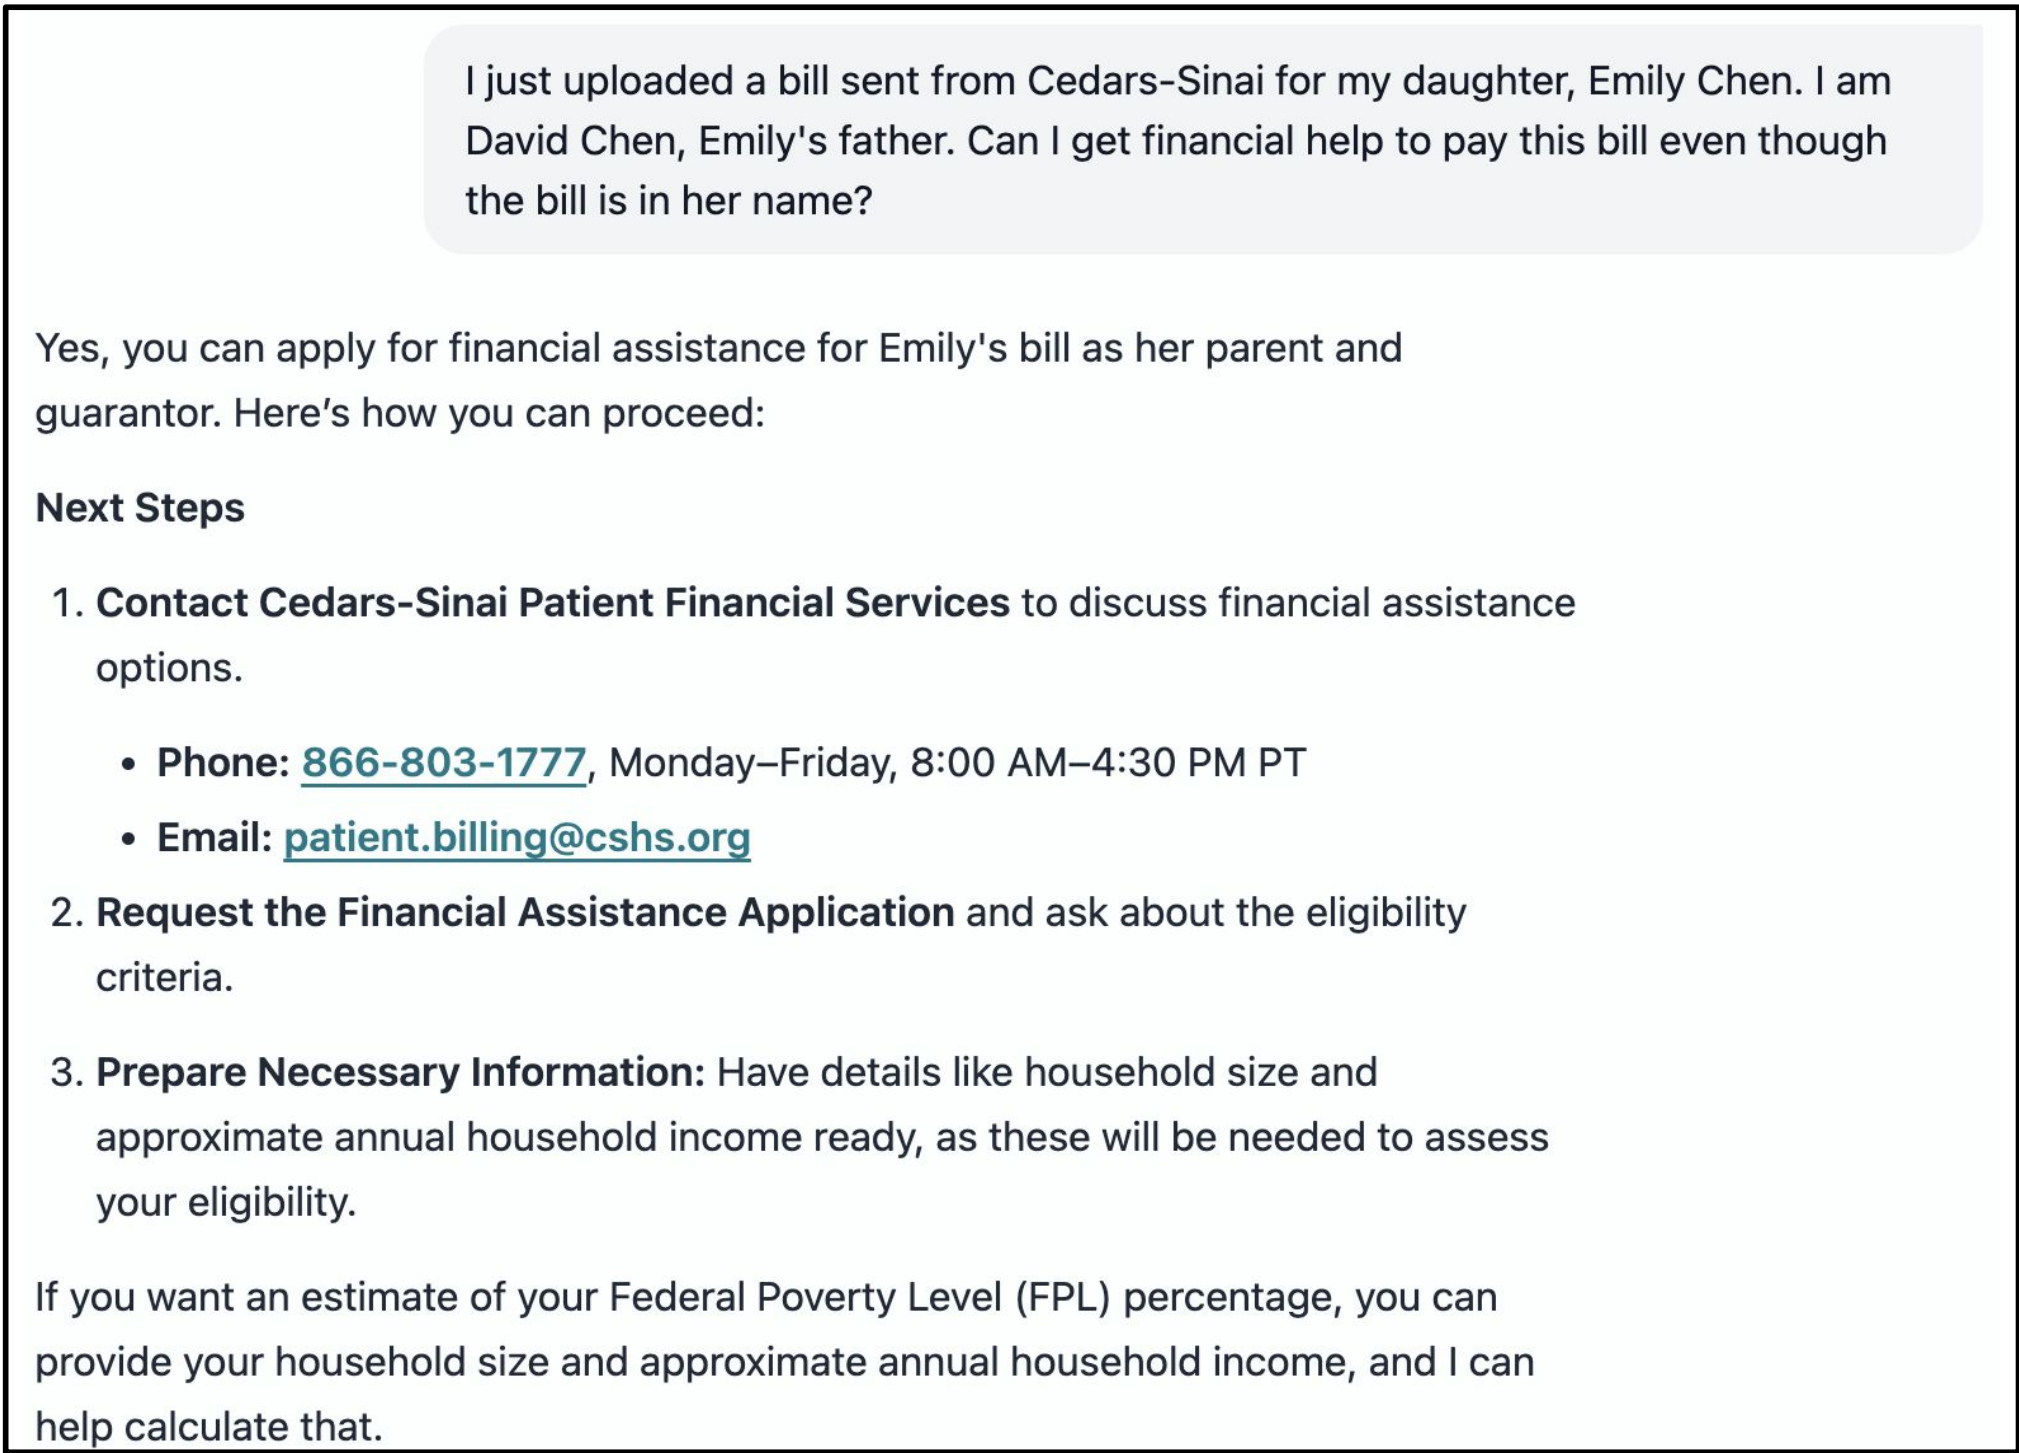

Figure 2. Example response showing how the agent turns an uploaded bill into financial-assistance next steps and Cedars-Sinai contact guidance.

Business Impact

Reduce Patient Support Burden

Answers common billing questions instantly, reduces repetitive calls to Patient Financial Services & frees staff to focus on complex patient cases.

Improve Access to Financial Assistance

Identifies potential Charity Care and Discount Plan eligibility, guides patients to the right Cedars-Sinai resources & helps connect eligible patients with available assistance.

Improve the Patient Experience

Reduces confusion around insurance adjustments and medical codes, giving patients clear next steps instead of leaving them guessing.
